

Cédrik Letarte

Software
engineering intern

Contact details

450-801-3708

cedrikletarte@gmail.com

Skills

Web application (React, Next.js, ASP.NET and Dash)

Software programming (C#, Java, and Python)

Server configuration and administration (Windows & Linux)

Game development (using the Unity game engine)

CI/CD pipeline, deployment and containerisation

Mobile application development (Android & iOS)

Database management (SQL, MySQL, NoSQL, JSON, and XML)

System interface usage (Bash and PowerShell)

Education

● Bachelor's Degree in Software Engineering

since 2023

École de technologie supérieure, Montréal, QC

● Computer Science Technician Diploma

2023

Cégep de Valleyfield, Salaberry-de-Valleyfield, QC

Professional Experiences

● Web developer

05/2025 - 08/2025

OODA Technologies Inc, Montréal, QC

[Projet CRACCEN \(Défense nationale du Canada\)](#)

- Implemented a ship trajectory optimization algorithm to safely navigate through maritime minefields.
- Developed a feature allowing users to define ship departure and arrival zones for route optimization.
- Implemented a customizable visualization system for mine probability zones, including dynamic sliders to map value ranges (0-1) to colors.
- Configured a GitLab CI/CD pipeline to automatically deploy the application in a Docker container upon updates to the main branch.
- Integrated Redis with Dash to manage a processing queue, enabling action persistence and multi-user support.
- Enhanced a data conversion pipeline to generate .tiff files from raw data, optimizing geospatial overlay rendering with MapServer.
- Designed a system allowing users to manage layer visibility via a toggle button, with automatic saving of preferences to the database.

● Specialized IT Technician

05/2022 - 09/2023,

01/2024 - 04/2024

Centre hospitalier régional du Suroît, Salaberry-de-Valleyfield, QC

- Monitor the granting of access to software and files for users through the use of Active Directory.
- Ensure the configuration and setup of workstations for users, thereby guaranteeing an optimal work environment.
- Plan and execute the replacement of outdated computer equipment, ensuring an up-to-date and efficient infrastructure.
- Proactively and reactively resolve various issues related to computer hardware and software, implementing effective solutions.

Softwares

- SSMS
- BaseX
- Eclipse
- Visual Studio
- Visual Studio Code
- IntelliJ
- Pycharm
- Oracle
- Oracle Apex
- VirtualBox
- Wireshark
- Android Studio
- Xcode
- MagicDraw
- Docker Desktop
- Power BI
- Unity
- Octopus
- SCCM
- Dameware
- DirectorX
- Citrix

Languages

French
English (functional)

Other Work Experience

● Dairy Products Clerk

05/2019 - 05/2022

IGA, Saint-Lazare

- Restocking, order reception, and customer service.

Projects

● Portfolio www.cedrikletarte.com

Personal portfolio built in React showcasing my academic background, skills and projects.

- Next.js (TypeScript)
- React
- Material UI (MUI)
- Framer Motion
- Next-intl (internationalization)

● Multifunctional Server [cedrikletarte/homelab-infra](https://cedrikletarte.com/homelab-infra)

Full infrastructure setup on an Ubuntu server combining security, performance and reliability.

- Domain name with Cloudflare protection
- Behavior-based intrusion detection
- Reverse proxy with SSL/TLS certificate
- Robust firewall
- Docker container
- VPN

● Interactive 3D Globe [cedrikletarte/earth](https://cedrikletarte.com/earth)

Web application for visualizing an interactive 3D globe with custom map styles, city search and atmospheric controls.

- Next.js (TypeScript)
- CesiumJS
- TileServer-GL (map tiles)
- Nominatim (geocoding)
- Docker

● Sandbox video game

Team-developed game combining 3D city building and first-person exploration, with a waterfall mechanic.

- Unity
- C#
