

Cédrik Letarte

Software
engineering intern

Contact details

450-801-3708

cedrikletarte@gmail.com

Skills

Mobile application development
(Android & iOS)

Web application development
(React, Next.js, ASP.NET and
DASH)

Software programming (C#, Java,
and Python)

Game development (using the
Unity game engine)

Server configuration and
administration (Windows & Linux)

Database management (SQL,
MySQL, NoSQL, JSON, and XML)

System interface usage (Bash and
PowerShell)

Education

● Bachelor's Degree in Software Engineering

since 2023

École de technologie supérieure, Montréal, QC

● Computer Science Technician Diploma

2023

Cégep de Valleyfield, Salaberry-de-Valleyfield, QC

Professional Experiences

● Développeur web

05/2025 - 08/2025

OODA Technologies Inc, Montréal, QC

[CRACCEN Project \(National Defence of Canada\)](#)

-Implemented a ship trajectory optimization algorithm to safely navigate through maritime minefields.

-Developed a feature allowing users to define ship departure and arrival zones for route optimization.

-Implemented a customizable visualization system for mine probability zones, including dynamic sliders to map value ranges (0-1) to colors.

-Configured a GitLab CI/CD pipeline to automatically deploy the application in a Docker container upon updates to the main branch.

-Integrated Redis with Dash to manage a processing queue, enabling action persistence and multi-user support.

-Enhanced a data conversion pipeline to generate .tiff files from raw data, optimizing geospatial overlay rendering with MapServer.

-Designed a system allowing users to manage layer visibility via a toggle button, with automatic saving of preferences to the database.

● Specialized IT Technician

05/2022 - 09/2023,

01/2024 - 04/2024

Suroit Regional Hospital, Salaberry-de-Valleyfield

-Monitor the granting of access to software and files for users through the use of Active Directory.

-Ensure the configuration and setup of workstations for users, thereby guaranteeing an optimal work environment.

-Plan and execute the replacement of outdated computer equipment, ensuring an up-to-date and efficient infrastructure.

-Proactively and reactively resolve various issues related to computer hardware and software, implementing effective solutions.

Softwares

- SSMS
- BaseX
- Eclipse
- Visual Studio
- Visual Studio Code
- IntelliJ
- Pycharm
- Oracle
- Oracle Apex
- VirtualBox
- Wireshark
- Android Studio
- Xcode
- MagicDraw
- Docker Desktop
- Power BI
- Unity
- Octopus
- SCCM
- Dameware
- DirectorX
- Citrix

Languages

French
English (functional)

Other Work Experience

● Dairy Products Clerk

05/2019 - 05/2022

IGA, Saint-Lazare

- Restocking, order reception, and customer service.

Projects

● Portfolio

Design of a web page in React aimed at creating a space that highlights my knowledge and skills in IT. It is a portfolio detailing my academic background, areas of interest, technologies I work with, as well as my completed personal projects. You can visit it by clicking on the following link: www.cedrikletarte.com.

● Multifunctional Server

I set up a complete infrastructure on an Ubuntu server, integrating modern technologies to meet various needs while ensuring security, performance, and reliability. This project demonstrates my mastery of essential software engineering tools and my ability to solve complex problems independently.

Here are the main technologies and methods I used, each playing a crucial role in setting up this system:

- Domain name with Cloudflare protection
- Reverse proxy with SSL/TLS certificate
- Robust firewall
- Docker containers
- VPN

● Sandbox video game

My team and I developed a video game combining construction and first-person immersion. The central concept allows players to design their own city using an intuitive interface for selecting and manipulating 3D objects. Once the city is built, players can explore their creation in first-person view, with the ability to perform stunts to enhance their experience.

We integrated existing 3D models and programmed the game mechanics in C#, showcasing our expertise in programming and collaborative project management.
